10 companies across the Nordics demonstrating how circular business models become bankable.

SPHERE CIRCULAR FINANCE - 3STEPIT

The bank partnership that scaled circular IT

3stepIT provides end-to-end IT lifecycle management. By combining leasing with refurbishment and reuse, it turns used devices into a source of recurring revenue.

SPEHERE OCEAN

From fish skin to Nordic unicorn

Kerecis turned an underutilised fish by-product into a billion-dollar medtech business — proving how circularity, proprietary technology and market access can create both better outcomes and exceptional commercial value.

THE OPPORTUNITY

Make every device worth more

Businesses need IT, but buying new devices repeatedly is costly and resource-intensive. Leasing creates a way to manage, recover and reuse devices instead of letting them become waste.

THE CIRCULAR MODEL

Leasing makes reuse part of the business model

3stepIT retains control of the device lifecycle. Planned returns create a supply of used equipment that can be refurbished and put back to work.

BANKABILITY INDICATORS

From leasing company to circular platform

1. BANK-BACKED FINANCING MODEL
2. PREDICTABLE RETURNS AND RECOVERABLE ASSETS
3. PROVEN SCALE AND FINANCIAL PERFORMANCE
