

An ecosystem that creates value from every device

Foxway

SPHERE — REFURBISHED TECH

Foxway helps organisations use laptops, phones and other IT equipment as a service. It takes devices back, tests and refurbishes them, and returns them to the market. Instead of treating technology as disposable, Foxway builds value from several useful lives of the same device.

8.3bn SEK
Operating Revenue 2025

74%
Revenue from Circular activities 2025

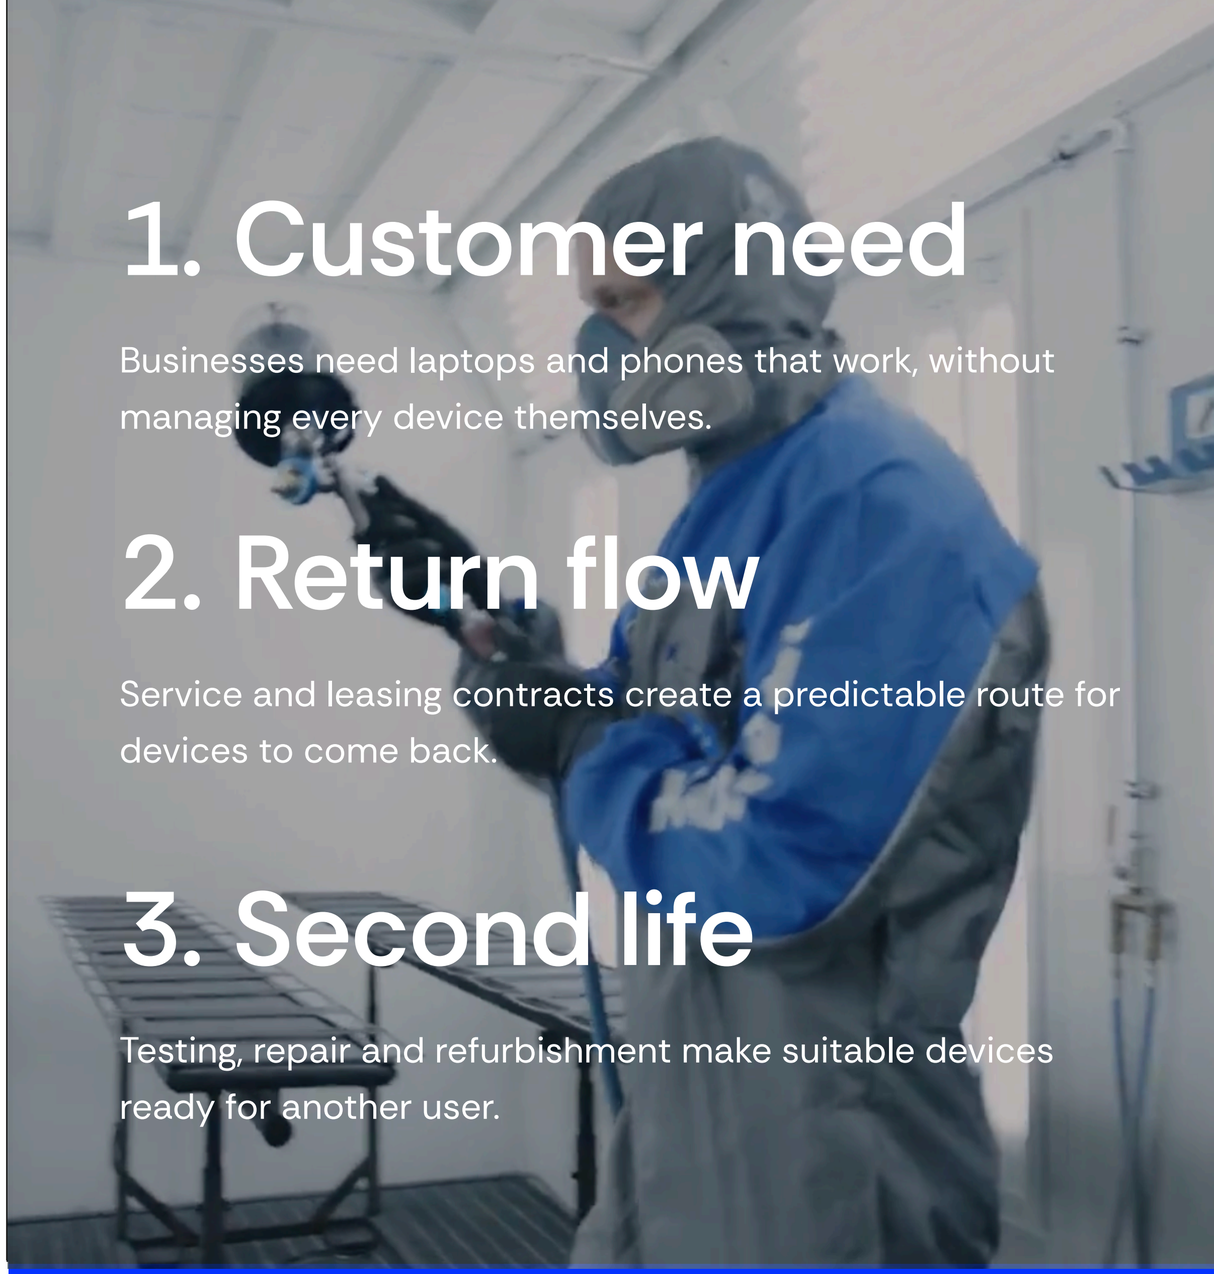

292 MSEK

The next device doesn’t always need to be a new one.

Organisations need reliable technology, predictable costs and secure handling of their equipment. Foxway built a service around that need: supply devices, manage them during use, bring them back at the right time, and prepare them for another customer.

1. Customer need

Businesses need laptops and phones that work, without managing every device themselves.

2. Return flow

Service and leasing contracts create a predictable route for devices to come back.

3. Second life

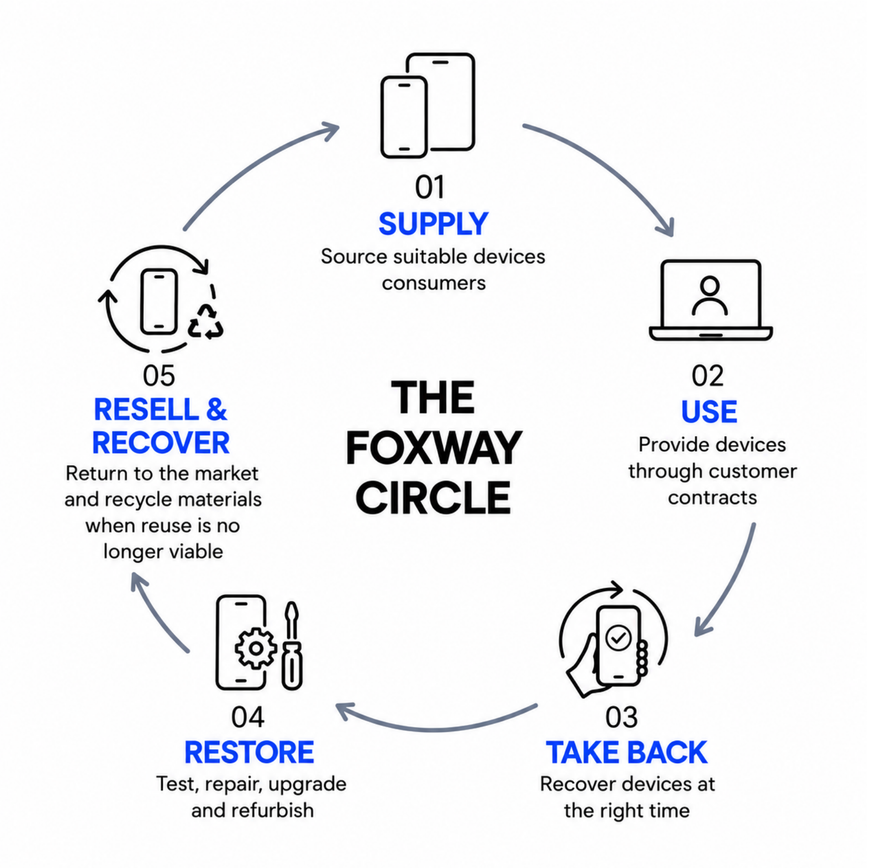

Testing, repair and refurbishment make suitable devices ready for another user.

WHY NOW?

The source material points to growing demand for refurbished electronics and a shortage of devices available for refurbishment. It also highlights how new-device price volatility and supply disruptions can make circular supply more resilient.

Keep the value in the device, not just the device in circulation.

Foxway's model works by managing the full journey of a device. The crucial skill is knowing when to take it back and what to do next, so it can be used again without spending more than the recovered value justifies.

2025: 74% of operating revenue came from circular activities; 1.8 million devices were reused and sold.

Foxway

From a Nordic idea to a European platform.

2009
FOUNDED

Foxway starts building a business around IT services.

2019
NORVESTOR INVESTS

A platform investment supports the next stage of growth.

2019–23
BUILD THE VALUE CHAIN

Nine acquisitions add capabilities and reach, including Estonia, the UK, Romania, Denmark and Germany.

INVEST TO CREATE THE FULL ECO-SYSTEM

2023
NEW MAJORITY OWNER

Nordic Capital acquires a majority stake; Norvestor reinvests.

2025
REPORTED SCALE

SEK 8.3bn operating revenue; 74% circular activities; SEK 292m adjusted operational EBITDA.

2026
FURTER GROWTH CAPITAL

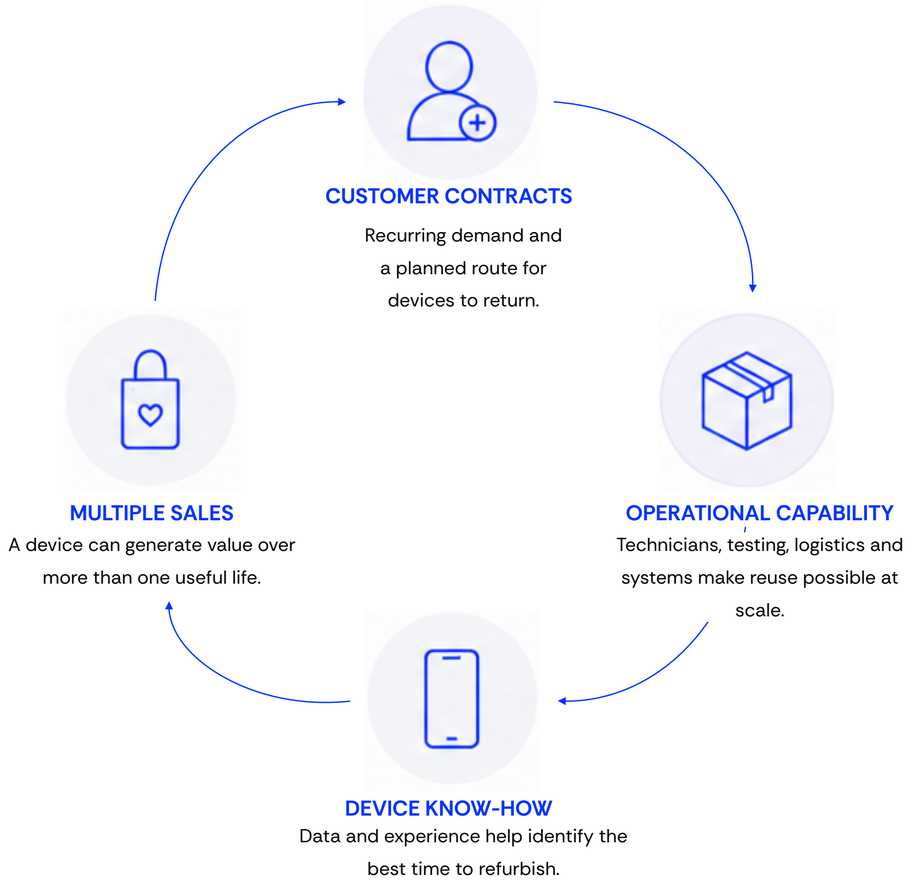

Owners inject SEK 300m to support sourcing and growth.

Circular services can improve customer value and create revenue from later device lifecycles, not just the initial sale.

Foxway

Circularity is not a side project. It is part of the business model.

Foxway combines long-term customer relationships with practical control over what happens to each device after its first use. That makes circularity commercially useful, rather than dependent on customers paying extra for a sustainability label.

The same device can be used, restored and sold more than once, retaining value that would otherwise be lost.

Foxway

Invest to build a circular IT ecosystem

The lesson: don't invest in circularity as a label. Invest where extending product life creates clear value for customers and the business.

01 CUSTOMER FINANCED FROM START

Long-term customer contracts generate recurring revenue and support predictable demand for refurbished IT devices. This creates a more capital-efficient model than relying solely on direct consumer sales.

02 INVEST TO CREATE AN ECOSYSTEM

Foxway connects device sourcing, financing, refurbishment and resale in one integrated offering. Investments in infrastructure, technology and partnerships enable circular IT at scale.

03 SCALING EFFICIENCY ACROSS THE VALUE CHAIN

Foxway captures value at every stage of the device lifecycle, from initial deployment to reuse and resale. Higher volumes and integrated operations can improve resource efficiency and strengthen unit economics.

"We did not try to buy market share by burning capital."

– Stefan Nilsson, Founder of Foxway

Foxway built a profitable business before accelerating growth

“Circularity can create strong financial returns when it is built into the business model.”

Henning Vold,
Norvestor

“Circularity is about preserving the highest value of tech devices for as long as possible.”

Alexia Bourget,
Foxway

THE INVESTMENT THESIS

Build a leading circular IT platform by connecting sourcing, customer contracts, take-back, refurbishment and resale.

1. PROVEN BUY-AND-BUILD STRATEGY

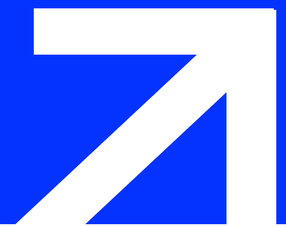

Nine acquisitions since 2019 have expanded capabilities and established a broader international footprint.

2. INTEGRATED CIRCULAR BUSINESS MODEL

Combines device-as-a-service, take-back, refurbishment and reuse to capture value throughout the IT lifecycle.

3. INTERNATIONAL ECOSYSTEM AND GLOBAL REACH

Foxway is today operative in 50 markets globally with a strong presence in Northern and Western Europe (UK, France & Germany) with established ecosystem refurbishment and operational hubs in the Nordics, Estonia and Romania
