

From circular innovation to bankable circular infrastructure

SPHERE — CIRCULAR INFRASTRUCTURE

TOMRA has evolved from a bottle-return technology pioneer into a global circular infrastructure platform, enabling collection, sorting and resource recovery at scale.

Its established business, diversified technology portfolio and financial track record make it a compelling example of circularity at the bankability end of the spectrum.

WHY IT WORKS

TOMRA combines proven technology, a global installed base, regulation-driven demand and service opportunities to support long-term growth and strengthen its position in the circular economy.

from BELIEF *to* BANKABILITY

TOMRA turns regulations into a scaled commercial business.

With an established global installed base and service- and volume-related revenues, TOMRA demonstrates how circular infrastructure can move beyond market potential into an established business model.

€ 174M
EBITA 2025

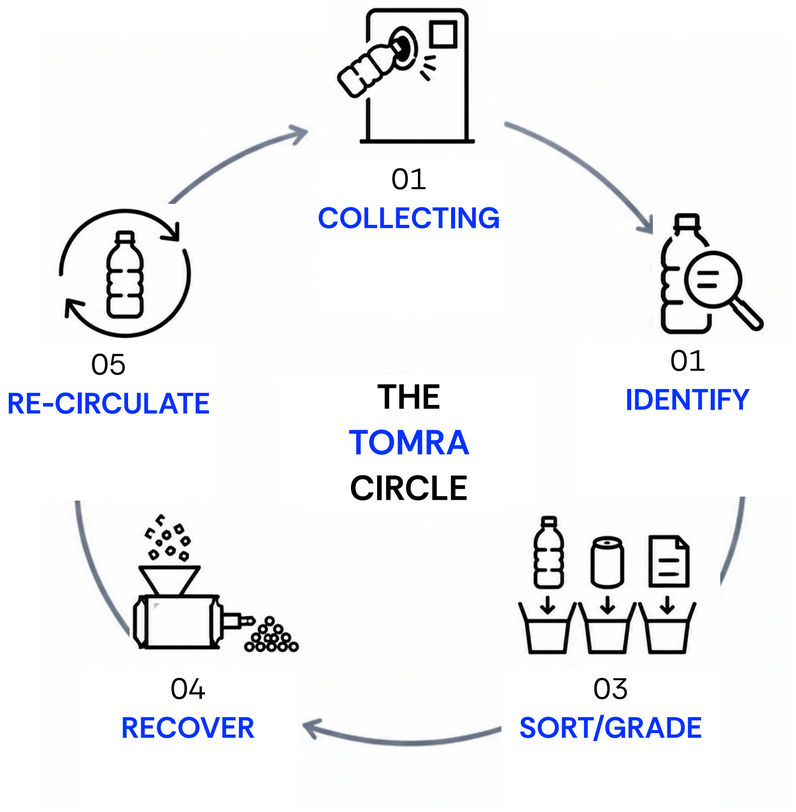

TOMRA is positioned to benefit from the growing need to turn waste into valuable resources through automated collection, advanced sorting and food processing technologies.

Turning waste into valuable resources

TOMRA enables circularity at the system level by connecting collection, identification, sorting and resource recovery.

The key question is not only how its technology supports circular material flows, but how deeply circularity is embedded in TOMRA's own business and products.

VALUE CREATED AT EACH STEP

HIGHER PURITY
Separating materials by type and quality

HIGHER RECOVERY YIELDS
Recovering more valuable materials from waste streams

MORE USABLE RESOURCES
Improving the quality of recovered materials for further use.

STRONGER CIRCULAR ECONOMICS
Helping make material recovery more commercially viable.

Regulation, resource scarcity and demand for recycled materials are driving the need for more efficient collection, sorting and resource recovery infrastructure.

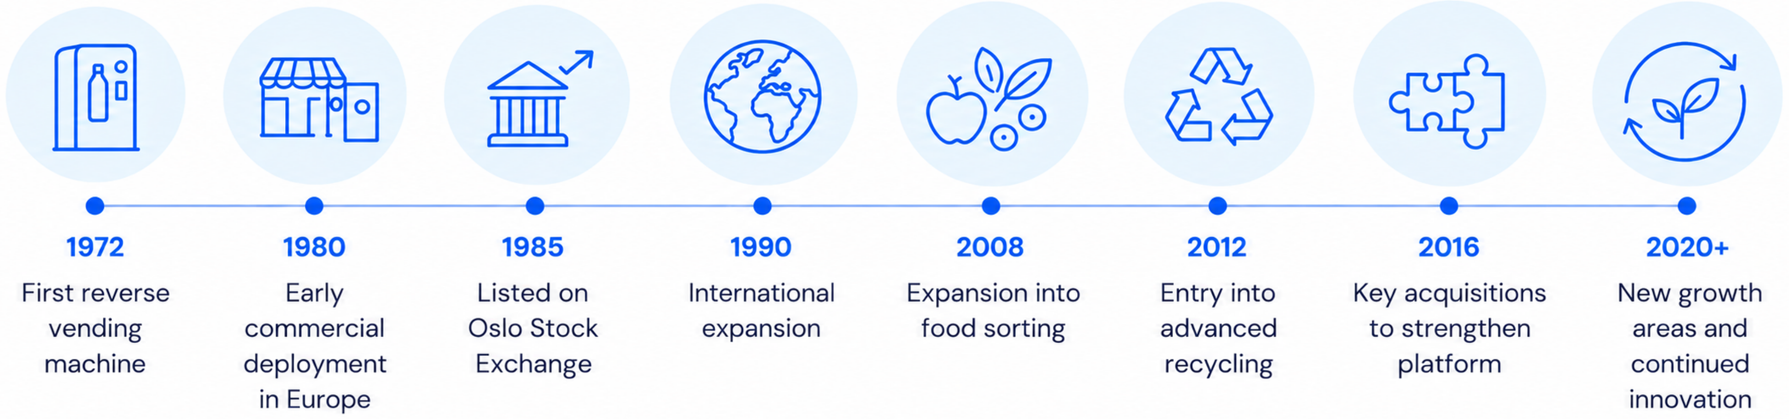

TOMRA

From innovation to a scalable platform

01 PROVE
Build and validate the core technology

02 SCALE
Expand globally and build recurring revenues

03 BUILD THE SYSTEM
Broaden the platform through adjacent markets

HOW THE PLATFORM HAS GROWN

€1.32bn

(FYE 2025)

THE COMMERCIAL THESIS

A large installed base, service relationships and complementary technologies create opportunities for recurring revenue, upgrades and expansion into adjacent markets.

The system is the competitive advantage

TOMRA combines hardware, sensors, software, service and market know-how across an installed base that customers rely on every day.

01 — INSTALLED BASE AT SCALE

A strong position in the field

TOMRA's global installed base creates customer relationships, service opportunities and a platform for continued growth.

02 — TECHNOLOGY (SERVICE, SOFTWARE & DATA)

Value beyond the machine

Service, software and upgrades support customer performance and create opportunities for ongoing revenue throughout the equipment lifecycle.

03 — SCALE AND COMPETITIVE ADVANTAGE

Strength through integration

TOMRA combines its installed base, technical expertise and complementary technologies to build a platform that is difficult to replicate.

04 — COMMERCIALLY VIABLE CIRCULAR SYSTEMS

Making circularity work at scale

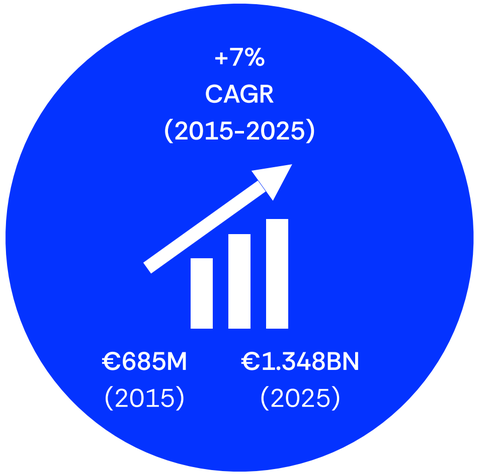

By enabling efficient collection, sorting and resource recovery, TOMRA helps make circular systems more effective and commercially viable.

TOMRA combines technology, infrastructure and ongoing customer relationships to enable commercially viable circular systems at scale.

System provider of circularity

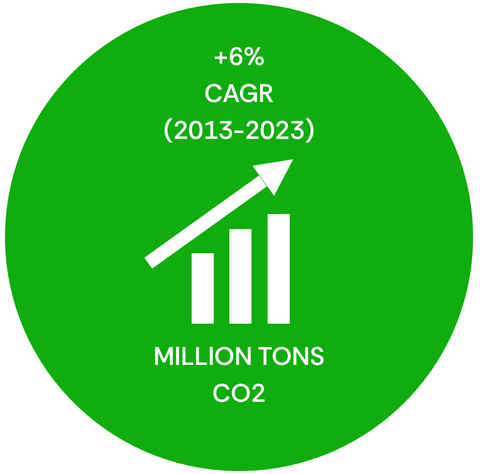

TOMRA has consistently delivered profitable growth while enabling significant emission avoidance through its products.

REVENUE GROWTH

ANNUAL DIVIDENDS

AVOIDED EMISSIONS FROM TOMRA PRODUCT USE

TOMRA demonstrates how a circular technology platform can combine sustained revenue growth, shareholder returns and increasing avoided emissions.

BANKABILITY INDICATORS

1. PROVEN FINANCIAL PERFORMANCE

TOMRA generated €1.32bn in revenue and €174m in EBITA in 2025, with a 13.2% EBITA margin. A decade of revenue growth and consistent shareholder returns demonstrate an established, profitable business.

2. GLOBAL INSTALLED BASE AND RECURRING REVENUES

Approximately 120,000 installed units worldwide create an established customer base and ongoing opportunities for service, software, upgrades and volume-related revenue.

3. REGULATION DRIVEN CIRCULAR INFRASTRUCTURE AT SCALE

TOMRA combines proven technology, global reach and regulatory tailwinds to enable collection, sorting and resource recovery at scale. Its established platform positions the company to benefit from growing demand for circular infrastructure.
